

## About Us

Sense Corp is a new breed management consulting firm with creativity, expertise, and a fresh-thinking approach. We measure our success by our clients' success—partnering with them to develop strategy, implement complex IT solutions, and deliver fresh ideas that actually work.

Sense Corp fosters a culture that enhances consultants' ability to flourish professionally and personally. Our employees enjoy a superior work-life balance, intensive new hire training, ongoing mentoring, and opportunities to be leaders without the limits of a rigid career structure.

Sense Corp consultants possess integrity, professionalism, curiosity, intelligence, and flexibility. We are a dynamic team that gets results.

In addition to being on the Inc. 5000 List of Fastest Growing Privately Held Companies for five years running, we're also consistently voted a Best Place to Work in our major markets. In short, we are a growing company looking for people with the excitement and enthusiasm to grow with us.

*Sense Corp is an equal opportunity employer that values diversity & individual contribution. Employees are competitively rewarded for outstanding performance through salary, benefits & bonus opportunities.*

## **Positions Open to Graduates**

### **Technical Analyst**

We are looking for graduates with a strong technical aptitude and great problem solving skills who are good at communicating the ins and outs of different technologies to less tech-savvy parties.

The ideal candidate should be able to approach their career with the following attributes:

- Has an innate curiosity for how everyday conveniences such as smartphones, Google docs, Google analytics, and Dropbox work to streamline work/school processes
- Interest in engaging in training, self-learning, interfacing with technical resources to expand marketable skillset
- Desire to interface with internal and external technical architect and developer resources on a daily basis to provide project value
- Interest in leveraging developed technical knowledge to provide relevant insight to various clients/industries
- Technical Analysts may engage in the following tasks:
  - System acceptance testing
  - Development: SDLC/Web
  - Statistical Modeling/Forecasting
  - Business Intelligence
  - Translating business requirements into technical requirements.
  - Documenting technical concepts within deliverables
  - Technical Assessment Work: IT strategy

### **Business Analyst**

This position is the client's "guide" in helping them understand and improve their business processes and corporate strategy. We are looking for graduates with strong problem solving abilities and exceptional communication skills.

Business Analysts serve as the bridge between the business and technical interests on a project. As a first-year BA, one can expect to focus heavily on project documentation, requirements gathering, solution testing and analysis, and overall client communication.

The ideal candidate should be able to approach their career with the following attributes:

- Demonstrated ability to break down daunting challenges into smaller, manageable pieces
- Aptitude for effectively communicating complex processes and ideas to a variety of audiences
- Knack for identifying key business opportunities – strategic, technological, or process-focused – and quantifying their value
- Interest in applying business principles and critical thinking skills across a myriad of industries and functional areas
- Ability to multitask, adapt, and deliver value in dynamic environments with ever-changing client needs
- Experience building and managing relationships
- Proficiency with the Microsoft Office Suite
